

Project Catalogue

Edition 11, March 2019

This catalogue

This catalogue has three parts:

Part 1 A summary of each project organised against our three complementary research programs, plus a section for cross-cutting projects (those that address two or more of our three program areas):

Integrated Building Systems	Developing new low-carbon products and services and finding ways to communicate best practice design through rating tools, standards and display homes.
Low Carbon Precincts	Creating models, guidelines, standards and data for delivering low carbon developments at a precinct level and communicating best practice sustainable city planning through exemplar precinct developments and tools
Engaged Communities	Capturing and building a new community appetite for low carbon living.

Part 2 Glossary

Part 3 Detailed list and description of project outputs to date. These include research outputs by our Higher Degree Research students (for details of their research, please refer to our Catalogue of Higher Degree which is available on our website). For details of tools, please refer to our Tools Catalogue, also on our website. Many projects have individual factsheets developed by their project team which are available on our website. These projects have their project number in Part 1 marked in **bold font**.

All projects are Australian based unless otherwise noted.

This catalogue is a living document that evolves as new research becomes available. It is reviewed quarterly and updated as necessary.

The CRC for Low Carbon Living

We are Australia's only end user driven national research and innovation hub whose core purpose is to transform the built environment to a low carbon future. Our mission is providing industry and government with collaborative research which captures community imagination and creates opportunities for low carbon technologies, materials, design and planning innovations. These social and technology solutions, and policy evidence will facilitate the transition to a low carbon built environment.

Part 1

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
PROGRAM 1 INTEGRATED BUILDING SYSTEMS														
RP1001	Optimising HVAC and PVT systems for different building typologies	Optimise the efficiency of PVT and HVAC systems by matching them to building characteristics, building thermal demand and climate regimes	<ul style="list-style-type: none"> Literature review Develop PVT building model Trial in two case studies (living laboratories) 	1	1		1	1	1			2		
RP1002	Heating and cooling buildings using a solar thermal collector	Overcome heat generation limitations of current solar thermal collectors by designing and testing a building heating and cooling system driven by a roof-top mounted concentrating collector	<ul style="list-style-type: none"> TRNSYS modelling of solar inputs and building energy demands to select the optimum absorption cooling system components and operation conditions Validate model 		1			4	7			1		
RP1003	Risk and opportunities of incorporating photovoltaics into buildings	Identify the near- and long-term architectural, technical and legal/policy risks and opportunities for building integrated photovoltaics (BIPV) and develop a roadmap for short- and long-term deployment	<ul style="list-style-type: none"> PV building integration scoping study Develop value chain and cost analysis Functional analysis of BiPV 		2	2								
RP1004	Investigating next generation standards for geopolymers using flyash and slag	Reduce the use of Portland Cement by developing performance criteria for low carbon (geopolymer) concrete made using flyash and slag byproducts	<ul style="list-style-type: none"> Establish industry working group Literature review on flyash and slag based concrete Identify barriers to use Develop performance standards 		1	1	4		1					
RP1006	Cost effective and socially acceptable net zero carbon homes	Develop an evidence-based rating tool that integrates housing design with new low carbon materials and technologies to identify the most economically viable low energy and low carbon combinations	<ul style="list-style-type: none"> Literature review Investigate new designs, materials and technologies for energy reduction Monitoring 60 low carbon houses at Lochiel Park Stakeholder consultation Develop, validate and trial an integrated design algorithm and rating tool 	1	2	1								

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
RP1007	Improving photovoltaic performance by modelling and measuring expected and actual energy production	<ul style="list-style-type: none"> Optimise PV performance by measuring and simulating outputs using energy yield, local weather data and sophisticated algorithms Refine and test the Solar Analytics algorithm and tool that compares predicted to actual energy produced 	<ul style="list-style-type: none"> Review PV algorithms Develop and trial new algorithms Review BMS products Incorporate new algorithms into Solar Analytics' products 		2									1
RP1008	Industry support mechanisms for adoption of renewable energy heating and cooling	Address barriers to renewable energy space heating and cooling adoption and stimulate market demand through training and education, IEA market support activities, and development of a world first solar heating and cooling technical standard (AS5389 solar heating and cooling standard)	<ul style="list-style-type: none"> Industry workshop Develop and validate TRNSYS component models Develop amendments to the interim standard Develop a guide to using the procedures in the NSW Energy Savings Scheme 		5	2	1	2	1		1		1	
RP1009	Evidence assessment of low carbon design of non-residential buildings	<ul style="list-style-type: none"> Development of an evidence assessment process for the low carbon, health and productivity benefits of design, engineering and management-based building interventions Analysis of the decision making process and the various actors/roles involved in early design stages of commercial office buildings and workplaces to determine when, in what form and to whom the evidence should be delivered 	<ul style="list-style-type: none"> Literature review and gap analysis Systematic reviews Case study analysis and post occupancy evaluation Questionnaires and interviews 	1	5	1	2	3	3	2	8	1	1	
RP1010	The energy, thermal and economic performance of an 8-star energy-efficient home (the CSR Low Energy House)	<ul style="list-style-type: none"> Accelerate uptake of low energy housing by providing the scientific and economic evidence of energy and thermal performance of an 8-star energy-efficient home 	<ul style="list-style-type: none"> Install sensors and data collection (12 months) Develop computer model Blower door and thermal imaging Verify model 		1		1					1		

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
		<ul style="list-style-type: none"> Use modelling and monitoring data to enhance energy performance 	<ul style="list-style-type: none"> Cost analysis Model high performance homes in different climate zones 											
RP1011	Development of net zero energy prefabricated modular homes	Investigate, develop, test and optimise designs and materials for low cost, net zero energy, prefabricated, modular homes	<ul style="list-style-type: none"> Literature review Design, modelling and optimisation Build, test and monitor prototype 	1	13	1	1	2	2		2	1		
RP1012	Development of low-emissivity pliable membranes for moisture management in building construction	Develop and test low emissivity pliable membranes to reduce condensation of building thermal insulation to maximise energy-efficiency gains	<ul style="list-style-type: none"> Literature view of international standards and approaches Develop industry education Develop, trial and test membrane 	1		1			1					
RP1013	Distributed energy storage in Australia: opportunities, benefits and barriers	Enhance the use of renewable generation technologies by identifying the key stakeholders and the opportunities, benefits and barriers to widespread deployment	<ul style="list-style-type: none"> Stakeholder analysis Scoping study 	1	2	1			1		8			
RP1014	Optimising the energy efficiency of pool pumps	Rank life- cycle costs, energy use, carbon emissions, and peak demand of pool pumping systems	<ul style="list-style-type: none"> Experimental testing of residential pool systems including solar pool heating system and pool filtering system Data analysis and reporting Solar pool heating modelling and optimisation Pool filtering system energy modelling and comparison Modelling of PV powered pool system 	1	1		1	1	2		1	2		
RP1015	Capturing waste heat from PVT collectors to drive a thermal cooling system	Integrate the BlueScope PVT roofing system with a market ready desiccant cooler developed by CSIRO and develop a business case	<ul style="list-style-type: none"> Photovoltaic panels convert 5-15% of solar radiation into electricity - ~80% of solar radiation is dissipated as heat which can be captured to provide a cooling cobenefit. 		3	1	2	1	2					
RP1017 RP1017e1	Validating and improving the BASIX energy assessment	Validate and improve the BASIX energy assessment tool for low-carbon dwellings by	<ul style="list-style-type: none"> Survey Data collection - electricity, gas, 		4		1	3	3					1

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	tool for low-carbon dwellings	monitoring the energy performance from new single and multi-unit dwellings and comparing results against BASIX predictions	building design and condition, social-demographics and occupant behaviour <ul style="list-style-type: none"> Model and analyse energy efficiency Compare data against BASIX predictions Inform BASIX model and government strategies 											
RP1019	Developing an index of the relative comfort of a home	Provide guidance on the home comfort and health benefits of energy efficient building upgrades	<ul style="list-style-type: none"> Literature review Develop index algorithm Test and develop the index and online tool 		2							1	1	
RP1020	Reducing the commercial barriers to new low-carbon geopolymer concrete	Develop performance criteria and manufacturing processes for low carbon (geopolymer) concrete	<ul style="list-style-type: none"> Develop process for the development of low carbon geopolymer concrete using flyash Develop a design, specification and construction handbook 		3	1	5	8	14		1			1
RP1020u1	Constructing seawalls from geopolymer	Demonstrate the use of the geopolymer concrete developed in RP1020 in a novel application, namely the construction of coastal protection units to build seawalls	<ul style="list-style-type: none"> Develop moulds Prototype and test units Monitor and evaluate performance 		1	1	1	1	1	1			1	
RP1021	Assessing policy options for the transition to low carbon built environment	Inform policy development and implantation by producing five thematically linked research papers addressing: <ul style="list-style-type: none"> Regulation and housing affordability Economic and other government policy instruments Benchmarking national building standards Operation of consumer choice in the property market Building industry culture 	<ul style="list-style-type: none"> Literature review Data collection and analysis 				1	1	5		2			
RP1022	Using timber, agricultural and	Reduce materials entering the waste stream					1							1

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	plastic waste products as fillers and binders for wood-based particle board	and the energy costs of producing new materials by investigating the use of timber, plastic and agricultural waste as alternative fillers and binders for wood-based particle boards												
RP1023	Home energy analysis and forecasting tool	Allow residential and small commercial energy consumers to manage and reduce energy costs by developing a user interface and intelligent algorithms. The algorithms will take local load, weather and energy generation inputs and automate the analysis of electricity production and consumption.	<ul style="list-style-type: none">• Data collection and analysis from homes• Develop energy forecasting and on-site storage algorithms for PV• Process data using algorithms• Presentation of results via an online portal				2					1		
RP1023u1	Assess the impact and performance of distributed energy resources (solar) to network disturbances	Analyse behind-the-meter voltage stability (5 second intervals) against grid events	<ul style="list-style-type: none">• Collate anonymised data from up to 100 sites• Analyse and model the response of the data to grid events• Reporting		1									
RP1024	Enhancing the Nationwide House Energy Rating Scheme (NatHERS) – assumptions, compliance and training	Enhance the energy assessment capability of the NatHERS tool by reviewing and making recommendations in relation to its assumptions, addressing compliance, and developing models addressing: <ul style="list-style-type: none">• Ventilation• Thermal comfort• Ceiling fans and produce training resources to develop the capacity of the home building design and construction industry	<ul style="list-style-type: none">• Review NatHERS assumptions, logic and settings against contemporary data• Review house energy performance data• Develop algorithm• Data collection and analysis• Research high cooling load houses• Develop a new cooling model• Develop training resources	1	3				4			2		
RP1026	Evaluation of automated HVAC fault detection and diagnostic tools for	Review and evaluate automated HVAC fault detection and diagnostics tools for commercial building energy efficiency	<ul style="list-style-type: none">• Review available FDD tools• Develop quantitative and qualitative performance metrics		2				1	1				

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	commercial building energy efficiency		<ul style="list-style-type: none"> Setup and configure building management system Trial FDD systems against metrics 											
RP1031	Development and optimisation of low carbon, medium-rise modular building structural systems	Design and test modular building, framing and jointing systems	<ul style="list-style-type: none"> Literature review Performance and design criteria and modelling for structural elements and joints Prototype joints Design and model framing and panel options Develop demonstration tool 	1	3	1	3	3	3		1			
RP1032	Facilitating large energy user deployment of off-site renewable generation	Develop a framework addressing the contractual, financial, and regulatory aspects of large energy users (e.g. councils, universities, manufacturers, corporates) directly purchasing electricity from off-site renewable energy generators such as a large scale solar or wind farms	<ul style="list-style-type: none"> Literature and case study review Qualitative research of stakeholder experiences, attitudes and preferences Engineering, legal, electricity and valuation research Develop a framework for off-site renewable energy 	1	1			2	1	1		1	1	
RP1032u1	Monitoring and assessment of Power Purchase Agreements	Explore opportunities for the deployment of off-site renewables through different possible Power Purchase Agreements and associated retailer tariffs	<ul style="list-style-type: none"> Software tool development incorporating findings from RP1032 		1							1	1	
RP1033	Mainstreaming HVAC in high performance commercial buildings	Facilitate high performance HVAC uptake by: <ul style="list-style-type: none"> Recommending changes to the National Construction Code (NCC) based on technical and cost benefit analysis of HVAC systems Investigating best practice HVAC designs and engage with industry Modelling novel and improved designs to investigate opportunities to improve best 	<ul style="list-style-type: none"> Modelling of a commercial HVAC system against 5 improved designs for major climate zones in Australian capital cities HVAC modelling to investigate energy use in 5 exemplar commercial buildings Design high performance HVAC model Run model for the 5 largest energy use components in the highest performing 		2	1			2		1			

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
		practice designs	commercial HVAC system • Develop improved HVAC designs											
RP1034	Reducing embodied and lifecycle carbon emissions through building design (value engineering)	Develop a new value engineering framework for buildings that optimises embodied and lifecycle carbon reductions (and minimises cost) through dematerialisation	<ul style="list-style-type: none"> Mapping existing value engineering practices Develop VE tool Life cycle carbon analysis and life cycle cost analysis of VE practices Develop a Carbon VE framework integrating carbon (kgCO₂eq) and cost (\$) metrics 		3				2	3	1	2	2	
RP1036	Decentralised energy markets	Scholarship top-up – see HDR catalogue												
RP1036u1	Embedded network and microgrid modelling tools	Increase the uptake of renewable energy generation by multi-unit dwellings by operationalising via an online platform a modelling tool for embedded networks and local mini grids for multi-unit residential buildings.	<ul style="list-style-type: none"> Refine and develop the prototype models Test functionality and user interface Prepare and deliver training and documentation 		1							1	1	
RP1037	Driving uptake of cool roofs on large footprint buildings	Determine the overall value proposition of cool roofs for large-footprint buildings, considering the influence of above-roof air temperature on the performance of HVAC equipment and photovoltaic panels	<ul style="list-style-type: none"> Literature review Undertake three large-footprint building case studies Model the impact of cool roofs on building thermal performance Develop cool roof design and cost-benefit calculation resources 	1	2	1						2		2
RP1037u1	The performance of cool roofs in cold weather	Understand if there are any buildings with cool roofs trade-off reduced summer cooling loads with increased winter heating loads	<ul style="list-style-type: none"> Further analysis of datasets from RP1037 Computational fluid dynamics (CFD) Thermo-fluid dynamic modelling 		1	1						1		
RP1040	Improving the improve thermal comfort, energy consumption	Develop and test an advanced hybrid ventilation system for schools	<ul style="list-style-type: none"> Assessment of the energy consumption and carbon emissions of a NSW school 		1	1				1				

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	and carbon footprint of schools		<ul style="list-style-type: none"> Investigate, develop and test an innovative hybrid ventilation system Experimental and theoretical evaluation of the installed system 											
RP1041	Enhancing the energy performance of volume build residential homes	Examine and develop performance criteria to enhance the energy performance of modern volume build homes considering building assemblies, insulation, air-tightness, air-conditioning ducting and ventilation	<ul style="list-style-type: none"> Building performance data collection and analysis Development of compliance criteria and methods 		1	1				1				
RP1042	Visualising home energy use and climate	Develop an integrated real-time web-based feedback platform to make householders aware of their disaggregated energy consumption and indoor climate and prompt energy saving actions	<ul style="list-style-type: none"> Install indoor environmental monitoring sensors (temperature and humidity) Develop monitoring codes and algorithms Develop web-based platform Report 	1								1		
PROGRAM 2 LOW CARBON PRECINCTS														
RP2001	A detailed functional specification for precinct design and assessment	Address the fragmented approach to precinct assessment by developing a: <ul style="list-style-type: none"> detailed functional specification for precinct design and assessment tools and databases digital precinct information model specification 	<ul style="list-style-type: none"> User survey and synthesis of data management for CRC and AURIN datasets Develop data management process Literature review of national and international of precinct assessment methods and tools Review and compare national and international LCA and costing principles and methods Develop detailed functional specification for precinct design and assessment methods and software tools 		3	1								

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
RP2002	An integrated demand forecasting and scenario planning tool for residential energy, transport, waste and water at a precinct scale	Develop and test an integrated ETWW tool for demand estimation and scenario planning which includes a method addressing the influence of household behaviour change	<ul style="list-style-type: none"> Research - ETWW demand forecasting methods and models Develop integrated ETWW demand forecasting tool Case study applications of tool 		6		3	5	2	2		1		
RP2003	A review of national and international delivery mechanisms for low carbon precincts	Identify exemplar delivery mechanisms (policy, economic and design) of national and international low carbon precincts and develop strategies to mainstream sustainable urban development, backcasting from a 50 year scenario	<ul style="list-style-type: none"> Literature review Case study review Develop exemplar selection criteria Evaluate exemplar case studies Research 		1		1	1	5					
RP2005	Comparison of the urban heat island effect at three scales in Sydney, Melbourne and Adelaide	<ul style="list-style-type: none"> Understand the contribution of materials, social systems, urban morphology, infrastructure, and climate system to UHI (including thermal mass, albedo and evapotranspiration) at the building, precinct and metropolitan scales in three Australian cities Develop a heat index for Australian cities 	<ul style="list-style-type: none"> Research – green roofs, facades and canopies Research – qualities of urban heat spots and behaviour change Research – materials, surfaces and thermodynamics Modelling 		3	1	5	10	12		13			
RP2006	The drivers of low cost and low carbon housing in Perth	Understand the drivers of low cost and low carbon housing across purchasers, investors and renters	<ul style="list-style-type: none"> Research - the demand drivers of apartment living in Perth Produce documentary 		1	1	1	1	1		1			
RP2007	Integrated Carbon Metrics (ICM) - a multi-scale life cycle approach to assessing, mapping and tracking carbon in the built environment	<ul style="list-style-type: none"> Develop a database and decision support tools for life cycle carbon emissions with emphasis on embodied emissions in the built environment from construction materials up to regional scales. Develop an economy-wide carbon flow analysis tool to track emissions along the production and supply chains of materials and products 	<ul style="list-style-type: none"> Develop carbon flow analysis tool Develop 3D visualisation of operational and embodied carbon of building or precinct planning projects in PIM tool Reconciliation of bottom-up and top-down carbon metrics Tool integration of input-output and hybrid life-cycle built environment inventory data 	1		4	2	11	7	2	2	5		

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
		<ul style="list-style-type: none"> Develop a 3D Precinct Information Modelling extension to enable the calculation and visualisation of carbon emissions for precincts during their planning stage. Evaluate low-carbon precinct scenarios 	<ul style="list-style-type: none"> Stakeholder consultation Develop scenarios for low-carbon precinct redevelopment and retrofitting Develop a framework for optimised strategies between life cycle assessment and costing for buildings 											
RP2007u2	Migration of the ICM precinct carbon assessment tool (RP2007) to the cloud	Support widespread uptake and use of the ICM precinct carbon assessment tool by transferring it from a MATLAB platform onto an interactive online facility	<ul style="list-style-type: none"> Transform core model algorithms Develop the online interface Reshape the database for multi-user operations User testing and platform deployment 		1							1	1	
RP2008	Reducing the energy consumption and carbon emissions in the treatment and use of wastewater solids	Evaluate and develop approaches to minimise emissions, energy consumption and the volume of wastewater solids	<ul style="list-style-type: none"> Compile data – energy use, energy bio-generation and CO2 and odour emissions Develop emission and energy measures Analyse interrelationships between treatment and transportation Review socio-economic and environmental impact of processing and land application 		11	1	2	4	4					
RP2009	A research agenda for low carbon transport	Scope research gaps and opportunities for low carbon transport	<ul style="list-style-type: none"> Targeted stakeholder consultation Synthesis 		1				5					
RP2010	Low carbon inclusions in state government built environment sector tenders	Develop and trial State government low carbon tender inclusions for built infrastructure procurement	<ul style="list-style-type: none"> Review of existing low carbon related inclusion in tendering documentation Identify key carbon reduction options for land development Review IS Rating Tool for Low Carbon related criteria and requirements Interviews with panel of providers based on IS Rating tool 	1	3	1	1	3						3

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
			<ul style="list-style-type: none"> Draft low carbon tender inclusions Design of process to prepare the client and contractor for new inclusions Development of tender assessment guide for low carbon inclusions 											
RP2011 & RP2011e1	An open precinct-level digital information model for low carbon management	Develop and test an open object-oriented database precinct information model (PIM) that defines how information is structured throughout the life-cycle of an urban precinct. The model will integrate geographical and real-time data across domains, including buildings, major infrastructure, energy, water, waste, transport and health	<ul style="list-style-type: none"> Develop the concepts and standards of a standardised data model Stakeholder consultation Develop and test model and GIS interface Pilot test on CRC project sites 		6	1	1	8	3		1	8		
RP2011u1	PIM demonstration project: UNSW Kensington campus	Build on RP2011 by trialling and testing the integration of BIM and GIS for precinct modelling purposes and 3D data integration and management	<ul style="list-style-type: none"> Data collection and processing Conceptual data modelling Database management system implementation and visualisation End-user workshop 		1	1			1	1		1	1	
RP2014	Measuring the sustainability performance of green infrastructure	Develop an integrated assessment model of the economic, social and ecological services, including carbon performance (storage and sequestration) delivered by green infrastructure	<ul style="list-style-type: none"> Literature review Develop sustainability indicators and benchmarks Develop model Test model using a Sydney case study 	1	1		1	5				1		
RP2015	Literature and practice review of Australian policies on urban planning and public health	Understand the use and benefits of active transport to support the future development of a calculator of health and associated productivity co-benefits from low carbon interventions	<ul style="list-style-type: none"> Literature review Analysis of the Household Travel Surveys database 	1	1				3					
RP2016	Assessing the impact of PV and energy prices and efficiency on domestic	Identify whether conservation or rebound (Jevons) effects are associated with solar PV take-up by examining the post-2008 changes	<ul style="list-style-type: none"> Analyse Ausgrid data Develop and test model 		1			2	1					

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	electricity consumption in Sydney	in electricity use by Sydney households who installed PV against those that have not												
RP2017	Energy benchmarking for efficient, low-carbon water recycling operations	Develop and test a method to benchmark the energy performance of water recycling systems (across construction, operation and maintenance and considering economic, environmental and public health matters)	<ul style="list-style-type: none"> Literature review of European energy benchmarking methodology for wastewater treatment Develop energy benchmarks for Australian wastewater treatment and water recycling systems Benchmark wastewater treatment and water recycling facilities - SA and NSW Assess the cost-benefits of electricity sub-metering for water sector energy efficiency and process optimisation Compare performance (energy, cost, carbon) of disinfection approaches Assess the performance (treatment process, energy, carbon) of a novel treatment technology for energy-efficient, lower emissions treatment and recycling 	1	1	2	2	5	4	1				1
RP2017u1	Visualisation of wastewater treatment energy use	Develop a web-based data visualisation tool for benchmarking energy use and carbon emissions of wastewater treatment operations	<ul style="list-style-type: none"> Data acquisition and analysis Online tool development 			1						1		
RP2018	Retrofitting urban precincts to create low carbon communities	Identify pathways to transition existing urban communities to low carbon energy and water using the precincts of UTS, Sydney Institute of TAFE and One Central Park as living laboratories	<ul style="list-style-type: none"> Stakeholder baseline Global best practice review of precinct retrofitting Precinct system / technology evaluation and forecasting Baseline model of the Broadway Precinct energy, water consumption, 	1	1			1			1			

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
			assets, costs and governance.											
RP2019	Carbon reductions from composting food waste for food production	Assess the social, environmental and commercial sustainability of different scalable models of food waste separation and composting for different urban forms.	<ul style="list-style-type: none"> Research social dimensions of food separation, composting and compost use Model GHG reductions and carbon storage from the use of compost Identify microbial composition of food waste compost 		1	1	2		1		2	1		
RP2021	Greening suburban travel - enhancing public transport and active travel options for low density suburban areas	Identify pathways to increasing customer usage of public and active transport, and model the impacts and benefits of networked smart bus systems, on-demand access to transport and emerging transport technologies	<ul style="list-style-type: none"> Literature review of travel demand drivers and behaviour change from private vehicles to public and active transport Travel supply and demand estimation and analyses Develop agent based model to assess investment options 	1	1	1	3	3	1	1	1	1		
RP2021e1	The role of the sharing economy for inner-urban travel	Investigate the role the sharing economy in relation to mobility services (i.e. share bikes, share cars, eco-caddies, Uber) can play in reducing inner-urban transport emissions	<ul style="list-style-type: none"> Investigate barriers to the provision of sharing economy mobility services Analyse servicing the needs of major inner-urban trip generators Map demand for sharing economy mobility services (Adelaide) Quantify the carbon abatement impact Industry engagement 		1			1	1	1				
RP2021u1	Improving the functionality of transport hubs / interchanges	Assess the role that public transport interchanges may play in improving public transport patronage (and thus reduce carbon emissions) using quantitative MetroCard data and qualitative survey data	<ul style="list-style-type: none"> Literature review Collection and analysis of user activity (Metrocard) data Collection and analysis of user survey data Production of guidelines and final report 	1	1	1				1				
RP2021u2	Reducing private car	Enhanced understanding of the motivators	<ul style="list-style-type: none"> Literature review 	1	1			1						

#	Title	Purpose	Method	Literature review / scoping study	Project report	Guideline / plan / manual / standard / specification	Thesis	Conference paper / poster / presentation	Refereed publication e.g. manuscript, book chapter	Case study	Other publication e.g. online article, submission	Tool / model / framework	Training	Other
	ownership	driving car ownership to develop strategies to boost the role of shared-economy mobility services	<ul style="list-style-type: none"> Interviews, surveys and data collection. 											
RP2023	A decision support tool for microclimate and urban heat island mitigation at a precinct and streetscape scale	Examine the relationship between urban forms and microclimate to develop a decision-support and visualisation tool of the microclimate and UHI mitigation performance of urban redevelopment options and cooling interventions	<ul style="list-style-type: none"> Data collection – energy, thermal comfort, vulnerability, urban form, microclimate Identifying existing and emerging evidence on UHI mitigation performance analysis UHI mitigation performance index Develop UHI mitigation options Develop object-oriented buildings and precinct models Develop decision support tool 		1				1			1		
RP2023u2	Using NSW OEH's climate, land-use and vegetation data to inform urban heat island management	Enhance informed decision-making by government, industry and community in managing urban heat by extending RP2023 to provide increased accessibility and 3D visualisation of OEH urban heat island-related data	<ul style="list-style-type: none"> Data collection and analysis Develop a database linking OEH data with existing urban information models Develop a web-based interface 		1							1		
RP2024	A guide to urban cooling strategies	Develop practical guidance for built environment professionals and regulatory agencies to moderate urban microclimates and mitigate UHI effects in major urban centres across a range of climate types	<ul style="list-style-type: none"> Literature review Consultation with industry partners Develop guide 	1	1	1								
RP2028	Calculating the health and productivity co-benefits of low carbon precincts	Develop a health and productivity co-benefits calculator in relation to the key features of the built environment at a precinct scale	<ul style="list-style-type: none"> Incorporate built environment metrics and carbon emissions into an existing health model Population survey Develop co-benefits model Integrate the model with existing tools 	1	2				2		1	2

Glossary

Framework Model	Describes the basic structure and components underlying a system or concept A simplified representation of a system or concept.
CORE	Community owned renewable energy
DEWNR	Department of Environment, Water and Natural Resources
DPI	Department of Primary Industries
ETWW	Energy, transport, waste and water
FDD	Fault detection and diagnostics
GHG	Greenhouse gas
HP	High Performance
HVAC	Heating, ventilation and air-conditioning
LCA	Life cycle assessment
NatHERS`	Nationwide House Energy Rating Scheme
NFP	Not for Profit
OEH	Office of Environment and Heritage
PCM	Phase change materials
PIM	Precinct information modelling
PV	Photovoltaic
PVT	Photovoltaic thermal hybrid solar collectors
TRNSYS	An energy simulation software package
UHI	Urban heat island
VE	Value engineering
ZEH	Zero emissions home

NP2002	Biophilic regeneration of a stormwater infiltration basin in Western Australia. Case studies of White Gum Valley and the Green Swing	In review	Cabaneck, A. and Newman, P.			Journal article		
NP2002	Biphilic cities and bioregional planning	In review	Cabaneck, A. and Newman, P.			Book chapter		
NP2003	Business models for sustainability. In Guerra-Santin et al. Living Labs	2016	Burbridge, M. and Morrison, G.	Springer	391-403	Book chapter	ISBN 978-3-319-33527-8	Living laboratories
NP2003	If Living Labs are the answer – What's the question? a review of the literature	2016	Burbridge, M.	Procedia Engineering	180, 1725-1732	Journal article	https://doi.org/10.1016/j.proeng.2017.04.335	Triple helix, living lab, collaboration, partnership, leadership
NP2003	Happy homes – the relationship between homes and mental wellbeing: a review of the literature	2016	Burbridge, M. and Morrison, G.	7th International Conference on Energy and Environment of Residential Buildings	Brisbane, Australia	Paper	DOI: 10.4225/50/5810740eae22a	
NP2003	Do as I say, don't do as i do, let alone do as I've done. A study of Australian universities' collective response to climate science. In Sayigh, A. (Ed). Transition Toward 100% Renewable Energy	2018	Burbridge, M.	Springer	49-58	Book chapter		Climate change, leadership, environmental management, partnership
NP2003	Australia's universities are not walking the talk on going low-carbon	2017	Burbridge, M.	The Conversation		Article	https://bit.ly/2K8xU1n	
NP2004	The Entrepreneur Rail Model: Funding urban rail through majority private investment in urban regeneration	2018	Newman, P., Davies-Slate, S. and Jones, E.	Research in Transportation Economics	67, 19-28	Journal article	https://doi.org/10.1016/j.retrec.2017.04.005	Urban rail, value creation, public-private partnerships, funding models
NP2004	Partnerships for private transit investment—The history and practice of private transit infrastructure with a case study in Perth, Australia	2018	Davies-Slate, S. and Jones, E.	Urban Science	2(3), 84	Journal article	https://doi.org/10.3390/urbansci2030084	Entrepreneur rail model, value capture, city deals, private railways, Western Australia, tramways, streetcars, land grants, future cities, urban planning
NP2004	The trackless tram: Is it the transit and city shaping catalyst we have been waiting for?	2019	Newman, P., Hargroves, K., Davies-Slate, S, Conley, D., Verschuer, M., Mouritz, M. and Yangka, D.	Journal of Transportation Technologies	9, 31-55	Journal article	https://doi.org/10.4236/jtts.2019.91003	Trackless trams, trackless operation, autonomous, self-guiding, city shaping, urban regeneration, entrepreneur rail model, transit activated corridors, congestion relief, job creation, sprawl relief, environmental benefits, social benefits
NP2005	Business models for the transition to solar of an industrial precinct	2018	Hebert, L.	Energy, Utility and Environment Conference	California, USA	Presentation		
NP2006	Interlocking practices and their influences in the home	2019	Breadsell, J., Eon, C., Morrison, G., and Kashima, Y.	Environment and Planning B: Urban Analytics and City Science		Paper	https://doi.org/10.1177/2F2399808318824114	Social practice theory, home system of practice, interlocking
NP2006	Expectations and motivations of residents moving into a low carbon development	In review	Breadsell, J.K., Byrne, J.J. and Morrison, G. M.	Sustainability		Journal article		Home, sense of place, security, low carbon development, social practice theory
NP2006	Behaviour and practice theories at scale	In prep	Eon, C., Breadsell, J. and Morrison, G.			Journal article		Living labs, practice theory, behaviour change, resource consumption, enabling change
NP2006	Urban Consonance, a potential new ecological urban planning and design paradigm	In prep	Heymans, A., Byrne, J., Morrison, G. Breadsell, J. and Eon, C.			Journal article		Urban planning, residential developments, systematic literature review, ecosystem

#	Title	Date	Authors	Journal / proceedings / publisher	No., vol, location etc	Type	ISSN, DOI, ISBN etc	Keywords
								services, urban consonance
NP4002	Application of a green infrastructure typology and airborne remote sensing to classify and map urban vegetation for climate adaptation	2016	Bartesaghi Koc, C., Osmond, P., Peters, A., and Irger, M.	Climate Adaptation Conference	Adelaide, Australia	Paper		
NP4002	A methodological framework to assess the thermal performance of green infrastructure through airborne remote sensing	2016	Bartesaghi Koc, C., Osmond, P., Peters, A., and Irger, M.	Procedia Engineering	180, 1306-1315	Journal article	https://doi.org/10.1016/j.proeng.2017.04.293	Urban heat island, green infrastructure, typology, local climate zones, urban micro climate, remote sensing, evapotranspiration
NP4002	Mapping and classifying green infrastructure typologies for climate-related studies based on airborne remote sensing data	2017	Bartesaghi Koc, C., Osmond, P. & Peters, A.	GrenInUrbs Conference	Orvito, Italy	Paper		
NP4002	Mapping local climate zones for urban morphology classification based on airborne remote sensing data.	2017	Bartesaghi Koc, C., Osmond, P., Peters, A., and Irger, M.	JURSE Conference,	Dubai - UAE	Paper	https://doi.org/10.1109/JURSE.2017.7924611	Buildings, vegetation mapping, remote sensing, laser radar, spatial resolution, software, land surface
NP4002	Towards a comprehensive green infrastructure typology: A systematic review of approaches, methods and typologies. In Urban Ecosystems	2017	Bartesaghi Koc, C., Osmond, P. and Peters, A.	Urban Ecosystems	20(1), 15-35	Book chapter	ISSN: 1083-8155	Urban greening, classification schemes, typologies, systematic review, ecosystem services, spatial scales
NP4002	Three minute thesis competition. Finalist 2017 presentation	2017	Bartesaghi Koc, C.	You tube video		Video	www.youtube.com/watch?v=0ea1NLar6VM&t=7s	
NP4002	Evaluating the cooling effects of green infrastructure: A systematic review of methods, indicators and data sources	2018	Bartesaghi Koc, C., Osmond, P. and Peters, A.	Solar Energy	166, 486-508	Journal article	https://doi.org/10.1016/j.solener.2018.03.008	Urban greening, thermal comfort, urban heat island, urban climatology, temperature mitigation, ecosystem services
NP4002	Understanding land surface temperature differences of Local Climate Zones based on airborne remote sensing data	2018	Bartesaghi Koc, C., Osmond, P., Peters, A., and Irger, M.	IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing		Journal article	https://doi.org/10.1109/JSTARS.2018.2815004	
NP4002	Mapping and classifying green infrastructure typologies for climate-related studies based on remote sensing data	In review	Bartesaghi Koc, C., Osmond, P. and Peters, A.	Urban Forestry and Urban Greening		Journal article		
NP4002	Evaluating the cooling effects of green infrastructure: A systematic review of methods, indicators and data sources'	In review	Bartesaghi Koc, C., Osmond, P. and Peters, A.	Solar Energy		Journal article		
NP4003	Towards proactive retrofitting: developing a regenerative framework for building retrofits	In prep.	Craft, W., Ding, L. and Prasad, D.			Journal article		Regenerative design, building retrofit, regenerative design principles, regenerative framework
NP4004	Co-benefits of low carbon policies in the built environment: An investigation into the adoption of co-benefits by Australian local government	2017	Karim, S.M., Thompson, S. and Williams, P.	Procedia Engineering	180, 890-900	Journal article	https://doi.org/10.1016/j.proeng.2017.04.250	Australia built environment, climate change, co-benefits, health and well being, liveability, local government, low carbon policy, urban planning
NP4005	Urban sustainable resilience values: driving resilience policy that endures	2016	Sanchez, A.X., van der Heijden, J., Osmond P and Prasad D	CIB World Building Congress	Tampere, Finland	Paper	https://bit.ly/2K9hxSn	Urban, resilience, policy
NP4005	Are some forms of resilience more sustainable than others?	2016	Sanchez, A.X., Osmond, P. and van der Heijden J.	Procedia Engineering	180, pp. 881-889	Journal article	https://doi.org/10.1016/j.proeng.2017.04.249	Urban, resilience, policy
NP4005	The untapped potential of information flows for long-term urban resilience policy	2016	Sanchez, A.X., Osmond, P. and van der Heijden J.	6th International Conference on Building Resilience - Building Resilience to Address the Unexpected	Auckland, New Zealand.	Paper	https://bit.ly/2MJrGqm	Urban, resilience, policy

#	Title	Date	Authors	Journal / proceedings / publisher	No., vol, location etc	Type	ISSN, DOI, ISBN etc	Keywords
NP4005	Challenges and opportunities behind long-term urban resilience policy in Australia, the UK and the USA	2017	Sanchez, A.X., van der Heijden, J. and Osmond, P.	State of Australian Cities Conference	Adelaide, Australia	Paper	https://bit.ly/2ywhqPJ	Urban, resilience, policy
NP4005	Resilient Policies for wicked problems: Achieving resilience in a complex and uncertain world through information integration. In Sanchez, A.X., Hampson, K.D. and London. G. (Eds) Integrating information across built environments	2017	Sanchez, A.X., Osmond, P. and van der Heijden J.	Routledge.	London	Book chapter	ISBN 9781351783286	Urban, resilience, policy
NP4005	The city politics of the urban age: a literature review of urban resilience conceptualisations and policies	2018	Sanchez, A.X., van der Heijden, J. and Osmond, P.	Palgrave Communications	Special Issue	Journal article		Urban, resilience, policy
NP4007	Synthesis of calcium silicate from selective thermal transformation of waste glass and waste shell	2017	Herianto, Pahlevani, F., and Sahajwalla, V.	Journal of Cleaner production	172, 3019-3027	Journal article	https://doi.org/10.1016/j.jclepro.2017.11.109	Calcium silicate compound, waste recovery, low carbon materials
NP4008	An evolutionary approach to single-sided ventilated façade design	2017	Marzban, S., Ding, L., and Fiorito, F.	Procedia Engineering	180, 582-590	Journal article	https://doi.org/10.1016/j.proeng.2017.04.217	Single-sided ventilation, façade design, genetic algorithm (GA), energy efficiency, ventilation efficiency, thermal comfort, visual comfort, multi-criteria assessment, genetic representation
NP4008	Façade optimization in a wind-driven ventilated residential building targeting thermal comfort, IAQ and energy consumption	2016	Marzban, S., Ding, L., Timchenko, V. and Irger, M.	International Journal of Environmental Science and Development	7, (5)	Journal article	10.7763/IJESD.2016.V7.804.	Façade, genetic algorithm, optimization, ventilation
NP4005	Reconceptualization of climate classifications and climate analysis tools to support evaporative building cooling strategies in the hot humid tropics	2015	Diaz, C., King, S., and Osmond, P.	ICUC9 - 9th International Conference on Urban Climate	Toulouse, France	Paper		Evaporative cooling, tropical climatology, climate analysis, building climate classifications
NP4005	Precipitation and buildings: estimation of the natural potential of locations to sustain indirect evaporative cooling strategies through hot seasons	2015	Diaz, D., Osmond, P. and King, S.	Living and Learning: Research for a Better Built Environment: 49th International Conference of the Architectural Science Association	Melbourne, Australia	Paper	https://bit.ly/2JXsvhv	Precipitation, indirect evaporative cooling, hot climates, climate analysis
NP4005	Influence of rainfall on the thermal and energy performance of a low rise building in diverse locations of the hot humid tropics	2016	Diaz, C. and Osmond, P.	Procedia Engineering	180, 393-402	Journal article	https://doi.org/10.1016/j.proeng.2017.04.198	Evaporative cooling, natural cooling, hot humid tropics, wind driven rain, low rise building
NP4010	Studies on optimal application of building integrated photovoltaic/thermal system for commercial buildings in Australia	2017	Yang, S., Fiorito, F., Sproul, A. and Prasad, D.	Solar World Congress	Abu Dhabi	Presentation		Building integrated PV, façade, energy efficiency, thermal comfort
NP4010	Study of building integrated photovoltaic/thermal double-skin facade for commercial buildings in Sydney, Australia	2018	Yang, S., Fiorito, F., Sproul, A. and Prasad, D.	Final conference of COST TU1403 "Adaptive Facades Network"	Lucerne, Switzerland	Paper	https://bit.ly/2Y3hlvf	building-integrated photovoltaic/thermal system, double-skin façade, energy demand, indoor thermal comfort, TRNSYS simulation
NP4010	Numerical simulation study of BIPV/T double-skin façade for various climate zones in Australia: effects on indoor thermal comfort	2019	Yang, S., Cannavale, A., Prasad, D., Sproul, A. and Fiorito, F.	Building Simulation	1, 51-67	Journal article	https://doi.org/10.1007/s12273-018-0489-x	Building-integrated photovoltaic/thermal system (BIPV/T), double-skin facade (DSF), indoor thermal comfort, semi-transparent PV glazing, TRNSYS simulation
NP4011	PV in Australian apartment buildings – opportunities and barriers	2015	Roberts, M. B., Bruce, A., and MacGill, I.	APSRC	Brisbane	Paper		
NP4011	Using PV to help meet Common Property Energy Demand in Residential Apartment Buildings	2016	Roberts, M. B., Huxham, G., Bruce, A., and MacGill, I.	ASSEP	Sydney	Paper		
NP4011	Solar apartments	2016	Roberts, M.B.	CRCLCL Participants Forum	Sydney	Poster		

#	Title	Date	Authors	Journal / proceedings / publisher	No., vol, location etc	Type	ISSN, DOI, ISBN etc	Keywords
NP4011	APVI Submission to the Victorian Government on the review of the general exemption order in response to the draft position paper	2016	Roberts, M.B. and Passey, R	VIC Government		Submission		
NP4011	PV for apartment buildings: Which side of the meter?	2017	Roberts, M. B., Bruce, A., and MacGill, I.	APSRC	Melbourne	Paper		
NP4011	Solar Apartments	2017	Roberts, M.B.	CRCLCL Participants Forum	Melbourne	Poster		
NP4011	Submission to the AEMC review of regulatory arrangements for embedded networks	2017	Roberts, M.B., Passey, R., Bruce, A. and MacGill, I.A.P.	AEMC		Submission		
NP4011	Submission in response to the NSW Dept of Planning & Environment discussion paper on consumer protections	2017	Roberts, M.B., MacGill, I.A.P. and Passey, R.	NSW Government		Submission
