Australia’s university of enterprise
An enterprising spirit

The University of South Australia (UniSA) is a globally connected and engaged university helping solve the problems of industry and the professions. Our teaching is industry-informed, our research is inventive and adventurous. We create knowledge that is central to global economic and social prosperity. Our graduates are the new professionals, global citizens at ease with the world and ready to create and respond to change. We are Australia’s University of Enterprise.

{ We are building an industry-connected, globally enterprising university. }

Prof. David Lloyd
Vice Chancellor and President
University of South Australia

Who we are
WE ARE AUSTRALIA’S UNIVERSITY OF ENTERPRISE ON THE GLOBAL STAGE, AGILE AND ASTUTE, KNOWN FOR RELEVANCE, EQUITY AND EXCELLENCE.

What we do
WE EDUCATE AND PREPARE GLOBAL LEARNERS FROM ALL BACKGROUNDS, INSTILLING PROFESSIONAL SKILLS AND KNOWLEDGE AND THE CAPACITY AND DRIVE FOR LIFE-LONG LEARNING.
WE UNDERTAKE RESEARCH THAT IS INSPIRED BY GLOBAL CHALLENGES AND OPPORTUNITIES, DELIVERS ECONOMIC AND SOCIAL BENEFITS AND WHICH INFORMS OUR TEACHING.

How we do it
WE OPERATE THROUGH A PARTNERED, END USER INFORMED CULTURE OF TEACHING AND RESEARCH WITH A COMMITMENT TO OUTSTANDING SERVICE, CONTINUOUS IMPROVEMENT AND SUSTAINABILITY.

What we value
INTEGRITY AND ACCOUNTABILITY
DIVERSITY AND SOCIAL JUSTICE
ENGAGEMENT AND COLLABORATION
AGILITY AND INNOVATION
SCHOLARSHIP AND EXCELLENCE

Acknowledgement of Country
UniSA respects the Kaurna, Boandik and Barngarla peoples’ spiritual relationship with their country. We also acknowledge the diversity of Aboriginal peoples, past and present.

TOP 3 YOUNG UNIVERSITY IN AUSTRALIA
RANKED #3, 2018 THE YOUNG UNIVERSITY RANKINGS

RATED FIVE STARS FOR EXCELLENCE
IN RESEARCH, EMPLOYABILITY, TEACHING, FACILITIES, INTERNATIONALISATION, SOCIAL RESPONSIBILITY AND INNOVATION
2018 QS STARS RATINGS
Our teaching advantage

Our graduates learn from highly experienced academics and industry professionals who are leaders in their field. UniSA is ranked as the number one young university in Australia for teaching quality in the 2018 Times Higher Education Young University Rankings.

UniSA is also home to Australia’s most internationally diverse group of academic staff and ranked 11th in the world in the 2019 QS World University Rankings. Our teaching staff provide graduates with global knowledge and the most current industry practices.

Experiencing the workplace

Our graduates move seamlessly into their professions and are highly adaptable to the changing global landscape, because we embed practical experience into every program. This includes internships and placements, real-world projects, industry and employer masterclasses, and opportunities to take part in community programs.

Our health science students alone undertake more than one million clinical placement hours each year, and our nursing school is one of the nation’s largest producers of highly capable nurses and midwives.

Improving access

Our commitment to equity in access to education is a cornerstone of our foundation and future, underpinned by our founding Act (1990). In 1993, we were the first university to appoint a Pro Vice Chancellor with the task of improving access to tertiary education.

Since then, we’ve made university study a reality for thousands of students from a wide variety of backgrounds through initiatives such as UniSA College, on-campus regional study options, support for Aboriginal and Torres Strait Islander students, and students with disabilities and learning difficulties.

UniSA College in particular offers tertiary preparation programs and has a dedicated team, UniSA Connect, who visit schools and the community to encourage students to pursue further study.

Flexible and online learning

We are committed to building an engaging curriculum, supporting our students to be productive professionals in a digital age, expanding our flexible learning arrangements, developing our academics to be leaders in the digital learning experience, and inspiring the broader University community through lifelong learning. UniSA Online is part of our digital success, offering 100% online degrees in 12 discipline and career areas.
"It's a big positive that students get exposed to working in the field and with industry throughout their degree. Our approach is to provide students with as many opportunities as possible to learn in a hands-on way. Connecting what we teach to real-world issues is really important – we want our graduates to be confident problem-solvers who are fully prepared for their professional careers."

Associate Professor Tom Raimondo
Program Director: Environmental Science / School of Natural and Built Environment

Named in the Top 5 Researchers Under 40 by ABC Radio National and UNSW, and recipient of a 2016 Young Tall Poppy Science Award
Campus community

Adelaide: Australia’s education city

The University of South Australia is based in the heart of Adelaide, Australia’s education city and the capital of South Australia.

Adelaide is a beautiful city, surrounded by parklands and within reach of white beaches, and the lush green hills and valleys of Australia’s premier wine district. It is also ranked as the world’s tenth most liveable city by the Economist Intelligence Unit’s Liveability Report (2018).

The state of South Australia has also been named as one of the top 10 places to visit in 2017 by the influential Lonely Planet world guide, being described as ‘Australia in a nutshell’.

City campuses

City West
Set on the western end of the city’s central business district, this campus is home to the EQUIS-accredited UniSA Business School, the newly built Pridham Hall, Samstag Museum of Art, Hawke Centre, the award-winning Jeffrey Smart Building and the nation’s first Architecture Museum.

City East
Staff and students from the Division of Health Sciences enjoy the very latest in teaching and research facilities, including laboratories, simulated learning spaces and on-site community health clinics, all featuring modern and industry-standard equipment and technologies.

Metropolitan campuses

Magill
Nestled within the lush foothills of Adelaide’s eastern suburbs, this picturesque campus is a meeting place of the Division of Education, Arts and the Social Sciences. It is here that our future teachers, social workers, psychologists, journalists and filmmakers begin their journey.

Mawson Lakes
Positioned next to South Australia’s Technology Park, our Mawson Lakes Campus is the natural fit for the Division of Information Technology, Engineering and the Environment. Located on campus is the dynamic Future Industries Institute (FII) and state-of-the-art Mechatronics Laboratory.

The Mawson Lakes Campus will soon be transformed into a national testbed of renewable energy technologies with the construction of a new $7.7 million facility expected to be completed in 2019, which will include solar panels and thermal energy storage.
Regional campuses

Mount Gambier
Located on the scenic Limestone Coast and in South Australia’s largest regional city, this campus brings together the very best in collaborative learning spaces and specialist teaching facilities for education, health and social work students. The recently constructed Mount Gambier Learning Centre has tripled the size of our facilities and enabled up to four times as many students to participate in our programs.

Whyalla
This campus holds a strong presence in the regional community of Whyalla, and extends to the western and northern regions of the state. Situated on a 22-hectare site in the heart of Whyalla’s education and cultural precinct, it boasts excellent teaching, research and accommodation facilities.
WHYALLA CAMPUS: THE LARGEST REGIONAL UNIVERSITY CAMPUS IN SA

INVESTED $22 MILLION IN THE REGIONAL CONNECTIONS PROJECT TO IMPROVE REGIONAL STUDENT EXPERIENCE
Study on demand

The University has over 25 years’ experience in delivering online and distance education. In 2018, we launched UniSA Online – a suite of 100% online degrees in 12 different discipline and career areas.

UniSA Online offers full flexibility for students, helping to better meet the demands of modern life. Students are able to control their study, with support available seven days a week, learning resources accessible 24 hours a day, and the ability to log in to an online learning environment anywhere, any time and on any device.

The fully-interactive, media-rich experience is designed to enhance learner engagement. There are online communities for support and discussions, capabilities to build an e-portfolio, sit an exam online and participate in virtual classrooms with dedicated course facilitators. We are transforming online learning and leading the digital learning experience.
UniSA’s Online Students Have
Graduate Employment Rates
Well Above the National Average

UniSA External Undergraduate Full-Time Employment Rate 86.1% – Graduate Outcomes Survey 2017
Inspired by challenges
Research at the University of South Australia is inspired by challenges and opportunities, partnered with industry and communities, and underpinned by excellence. Our academics engage in interdisciplinary teams to translate their research into meaningful outcomes.

Contributing to a research environment that is vibrant, responsive and outward-facing are the University’s research themes. The themes link our research strengths and address local and global socio-economic needs.

> **An age friendly world**
> Unlocking human potential across the community through intergenerational approaches.

> **Transforming industries**
> Enhancing Australia’s competitiveness through innovation and partnership.

> **Cancer**
> Taking on one of the world’s greatest health challenges with the aim of improving prevention, diagnosis, treatment and patient care.

> **Transforming societies**
> Transforming societies through global citizenship.

> **Healthy futures**
> Understanding, treatment and prevention of, chronic diseases.

> **Scarce resources**
> Developing safe and sustainable practices for managing the world’s finite resources – living within limits.
Research in the spotlight

National education transformation
UniSA researchers have fundamentally re-written the national paradigm for how we teach languages on a national scale. Beyond what is taught and how, the research has also had profound influence on national policies, assessment of language learning and teacher standards for language education. This has given Australia’s 9,000 language teachers the first unified guidelines for engaging with student cohorts.

Remediating the future
For 15 years, our researchers have been collaborating with industry to improve land remediation processes. In Australia, remediation is a $2 billion industry annually and is used across mining, intensive agriculture, urban development and waste management. The new highly accurate and reliable assessment tools have enabled environmental agencies to determine far better solutions for managing soils without comprising human health and safety; and have already delivered savings of $749 million worldwide.

Ready for combat
Saab Australia and UniSA are collaborating on the design of new combat consoles for Australia’s fleet of submarines and ships, bringing together the knowledge and design of defence technologies with industrial design capabilities and expertise in human factors. Saab has been selected to provide the combat management system and tactical interfaces for all ships in the Royal Australian Navy and the research group will be based at our Mawson Lakes Campus.

World-class vaccine innovation
In a highly successful collaboration with Sementis Limited and QIMR, UniSA researchers have developed new technology set to deliver vaccines for many diseases and conditions that are more effective and accessible. The new altered vaccine has been tested in preclinical proof of concept studies and has been shown to provide protection against serious infectious diseases, including the mosquito-borne Zika and Chikungunya viruses.

Creative minds
Creativity is often considered an art over science, yet both are needed in order to deliver advertising success. The Ehrenberg-Bass Institute for Marketing Science is leading the charge with research that focuses on the development of empirically grounded knowledge that helps brands to understand the mechanics behind marketing and how to spend their advertising dollars in the right way.

War on cancer
Using advanced computing simulation, UniSA’s world-leading radiation oncology and radiobiology researchers can analyse and predict the combination of treatment for hard to treat cancers. Our technology allows us to grow biologically correct tumours that represent a patient’s cancer, to measure how quickly it will grow and how aggressively it may spread. By predicting the best treatment plan and providing the right schedule and dose that will target the cancer while sparing healthy cells, we are one step closer to winning the war on cancer.

AUSTRALIA’S No.1 UNIVERSITY FOR INDUSTRY INCOME
THE WORLD UNIVERSITY RANKINGS 2018

ONE OF AUSTRALIA’S LEADING UNIVERSITIES FOR INTERDISCIPLINARY PUBLICATIONS AND STRATEGIC RESEARCH PARTNERSHIPS
U-MULTIRANK 2018
Enterprising partnerships

Real solutions don’t happen without great partnerships and we’re collaborating with local icons and international heavyweights to drive the advancements behind a better society.

Across the University, we seek to match our research capability and strengths with the opportunities, challenges and needs of our partners, and maximise the mutual benefits of engagement.

Best on ground

Our industry connections extend into the sporting elite through a partnership with the Adelaide Crows Football Club. UniSA students will have the opportunity to complete internships in the AFL and we are paving the way for further collaboration in sports science and sports business research.

Plastic mirrors

Our collaborative research approach, working with industry partner SMR Automotive, delivered the world’s first plastic automotive mirror – an advancement that could potentially reduce greenhouse gas emissions by more than 400,000 tonnes between entering the market and 2017.

Smart software

Students within the Division of Information Technology, Engineering and the Environment now have access to the latest software through a $450 million commercial grant from tech giants Siemens to prepare them for the fourth industrial revolution, or Industry 4.0, exploring trends in improved automation, machine-to-machine communication, artificial intelligence and continued digitisation of manufacturing.

Partners in IT

We’re partnered with global IT giant DXC Technology to support South Australia’s IT innovators, including students and industry, with a new space to exchange and explore ideas. The partnership also incorporates an IT Honours program that integrates world-class education with industry experience through an internship.

Marketing insights

A multimillion dollar corporate research and development program that delivers critical marketing insights to companies including Uber, Kellog’s and UniLever through the Ehrenberg-Bass Institute for Marketing Science.

Healthy futures

Partnering with Health SA’s Central Adelaide Local Health Network, we are working to improve patient care, teaching and learning outcomes for students, and health research through the earmarked new-look Queen Elizabeth University Hospital.

Australian Centre for Business Growth

The Australian Centre for Business Growth works to help small to medium enterprises (SMEs) reach their potential with the latest research, training and advice.

A new dawn

UniSA has partnered with one of Australia’s most successful visual effects companies, Rising Sun Pictures, giving media arts students the opportunity to undertake part of their degree in professional film studios, working alongside some of the best in the movie business.
Enterprising partnerships collaborate with over 2,500 companies worldwide.

The best defence
We have proudly partnered with industry to establish a new $40 million Saab Australia-UniSA Defence Technologies Institute.

Located in a new purpose-built wing at Saab’s Mawson Lakes Headquarters, the Institute will make a significant contribution to the delivery of a defence skilled workforce for significant Australian projects which are planned for the next 20–30 years.

The unique environment will provide a host of opportunities for collaboration, including student placements, the development of co-created curriculum materials, and joint research projects.

AUSTRALIAN FIRST: UniSA partnership with DXC Technology
Collaborations spanning the globe

From China to Ireland, Japan, India, South Korea and more, our reach spans the world through a wide range of global partnerships and agreements.

We’re taking on the world with a global academic community that includes partners in:

> China
  - Discovering new approaches to health care through a partnership with Shandong University and the formation of the China-Australia Centre for Health Science Research.
  - Launching the first Maple Leaf English-Mandarin bilingual school at our Mawson Lakes Campus in 2019, in partnership with Chinese company – Maple Leaf Education Asia Pacific Limited.
  - First Australian university to have a technology transfer office in China’s most vibrant industrial development hub, Suzhou Industrial Park (SIP).

> Germany
  - Working with Geisenheim University to offer a dual PhD in wine marketing.
  - Providing a unique opportunity for students to learn how to apply business principles to support the most marginalised groups move out of poverty in collaboration with the global organisation – Yunus Social Business.

> Korea
  - Establishing a King Sejong Institute in Adelaide as a hub for Korean Culture, business and language education – the only one of its kind in Australia.

> Ireland
  - Setting the stage for exciting new research in identity with Trinity College Dublin’s Long Room Hub Arts and Humanities Research Institute.

> Japan
  - Working to better understand and identify social theory issues with a research network including Keio University and other top Japanese universities.

> Malaysia
  - Learning more about how languages and linguistics work with the University of Malaysia (UM).

> Philippines
  - Assisting the University of Santo Thomas (USM) to develop the Philippines’ first Master of Physiotherapy program.

> South Korea
  - Launching a successful micro satellite mission for Earth observation through an ongoing agreement with Korea Advanced Institute of Science and Technology (KAIST).
Engineering possibilities

In an Australian first, UniSA has established a joint College offering both bachelor and master degrees in engineering and information technology with Xi’an University of Architecture and Technology (XAUAT) – one of China’s highest ranked universities for civil engineering.

The XAUAT UniSA AnDe College has been endorsed by the Chinese Ministry of Education and will deliver quality engineering education on an international scale.
We have a proud history in Aboriginal education, embedding real and measurable actions within our institution, and extending the process of cultural change to strengthen our position as the University of Choice for Aboriginal Peoples.

In 2014, we released our first Reconciliation Action Plan (RAP). A framework for building relationships, deepening respect and providing more opportunities for Aboriginal and Torres Strait Islander people.

Since then, we have continued to grow as an inclusive institution. We have implemented major reform for Aboriginal education, developed new economic partnerships with Aboriginal organisations, and created a leadership position directly responsible for Aboriginal engagement and strategy at the senior management level.

Through the release of our Stretch RAP, we are continuing to build on our track record of achievement and challenge our understanding of reconciliation.

CareerTrackers Indigenous Internship Program
In 2017, UniSA announced a ten-year partnership with CareerTrackers – a non-profit organisation that creates internship opportunities for Aboriginal university students, which align with their degree and career passion. It is aimed at supporting students by linking them with private sector employees to participate in paid multi-year internships, and full-time employment upon completion of their degree.

Aiming for success
The Australian Indigenous Mentoring Experience (AIME) is based at the University and provides Aboriginal high school students with the skills, opportunities, belief and confidence to finish school at the same rate as their peers.

Aboriginal Pathway Program
The Aboriginal Pathway Program is offered to Aboriginal and Torres Strait Islander students through UniSA College as an alternative pathway into a degree or diploma with UniSA. The program is free and provides additional support to help students succeed at the tertiary level.

Breaking ground
Trevor Ritchie made history when he graduated from UniSA’s Bachelor of Applied Science (Occupational Therapy) and became SA’s first identified Indigenous occupational therapist.

“It’s easy to feel overwhelmed by the enormity of closing the gap in Aboriginal health inequality, but I’m committed to playing my part.”

Trevor Ritchie
Irene and David Davy Scholarship for Advancement of Aboriginal Education recipient
Closing the gap

THE FIRST UNIVERSITY IN THE COUNTRY TO ISSUE A STATEMENT OF COMMITMENT TO AUSTRALIAN RECONCILIATION

“We want to ensure there are not only more opportunities for Aboriginal people to attend university and pursue the full range of career programs we offer, but also that they are successful and leave with the knowledge and skills to build both strong careers and strong communities.”

Professor Irene Watson
Pro Vice Chancellor for Aboriginal Leadership and Strategy and Unaipon Chair

Positive Futures
UniSA Professor Alex Brown is a world leader in Indigenous health and was elected as a Fellow of the Australian Academy of Health and Medical Sciences (AAHMS).

Leading a national research team, the Positive Futures project is focused on providing the leadership and expertise to address urgent health challenges in Indigenous communities and providing solutions around early intervention and community-led models.

“Reconciliation is much more than a word. It is a culture.”

Prof David Lloyd
Vice Chancellor and President, University of South Australia
Connected and engaged

With a growing presence on Adelaide’s cultural calendar and as a partner across arts, culture and sporting events, we are acting on a social mission to enrich our society.

Celebrating culture and expanding knowledge

- **Architecture Museum**
  The University’s Architecture Museum is a unique repository of over 200,000 items capturing South Australia’s architectural history. Open to the public, it is housed in a purpose-built facility at City West Campus.

- **The Adelaide Planetarium**
  We have opened Adelaide’s only planetarium, with events on all year round celebrating astronomy and all there is to know about the constellations, stars and planets.

- **Samstag Museum of Art**
  One of Australia’s leading university art museums, offering a changing exhibition program of contemporary visual art, and art of the past that has relevant for us today.

- **Bob Hawke Prime Ministerial Centre**
  The Hawke Centre, as it’s known, promotes effective democracy of its citizens and runs regular public lectures on topical issues in line with three key themes: strengthening our democracy, valuing our diversity and building our future.

- **JamFactory**
  We’ve strengthened our relationship with this South Australian arts and crafts icon with agreements to collaborate further and support emerging artists and designers to progress their careers.

- **MOD.**
  This futuristic museum of discovery offers immersive experiences to the public through dynamic and changing exhibition programs, challenging the senses and ideas about what makes us human.

Supporting talent

- **Generations in Jazz**
  We are the proud Education Partner of the annual Generations in Jazz event, which attracts more than 5,000 of Australia’s most talented musicians and a growing list of global artists. More than 350 ensembles including stage bands and choirs are showcased from around the nation.

- **Head of the River Regatta**
  The Schools’ Head of the River Regatta began in 1922, running both junior and senior coxed rowing events for South Australian secondary school students.

- **Football United**
  Free football matches for at-risk youth, in particular refugee, migrant and Indigenous children.

- **Australian Human-Powered Vehicle (HPV) Super Series**
  Known by many as the Pedal Prix, this event encourages and develops participants’ teamwork, engineering and enterprise skills.
Santos Tour Down Under
The University has been a key supporter of the world-class Santos Tour Down Under (TDU) cycling event held in Adelaide for more than 16 years. The TDU was the first event in the southern hemisphere added to the UCI WorldTour – the highest possible ranking for a cycling event.

In 2017, Team UniSA-Australia were proud recipients of the Winning Team Award with the fastest cumulative time recorded at the end of the six-stage race.

Flying high
We have partnered with the Adelaide Football Club to provide student placement opportunities, research collaborations and pre-university study access to the men’s and women’s rookie squads.

The centrepiece of the partnership is the formation of the Adelaide Crows-UniSA Institute for the Business of Sport, which will bring together specialist education in data science, business, marketing, sport science, social and digital media, journalism, visual effects, nutrition and psychology.
Community clinics and public service

We’re giving back to our community and allowing students to gain valuable experience through a range of clinics and services.

At the heart of health
Our community health clinics provide our students valuable clinical practice and the public with quality, low-cost exercise physiology, physiotherapy and podiatry services. We also offer mammography services through a joint venture with Breastscreen SA.

Supporting a strong society
Seeking justice and supporting equality as the foundations of a strong and fair society, our Legal Advice Clinic offers confidential, free advice on wills, power of attorney and personal injury matters.

Located at the Magill Campus, our Psychology Clinic also delivers affordable, high-standard psychology and counselling services.

Giving good advice
Home to the Ehrenberg-Bass Institute for Marketing Science and leaders in brand management research, the University established a Marketing Clinic based at City West Campus.

Under the supervision of qualified marketing practitioners and academics, the Marketing Clinic is staffed by students who provide free and confidential marketing advice to small and medium enterprises (SMEs). Areas of expertise include advertising, brand management and development, marketing strategy, market analysis, and buyer and consumer behaviour.
ONE MILLION
CLINICAL PLACEMENT HOURS
COMPLETED EACH YEAR BY
HEALTH SCIENCE STUDENTS

Our complete range of community clinics and services include:

> Dietetics
> Exercise Physiology
> General Practitioners
> High Performance
> Legal Advice Clinic
> Mammography

> Midwifery
> Occupational Therapy
> Physiotherapy
> Podiatry
> Psychology Clinic

LUMINOUS WORLD — CONTEMPORARY ART FROM THE WESTFARMERS COLLECTION AT SAMSTAG MUSEUM OF ART 2014. PHOTOGRAPH BY ALEX KWONG.

THE QUIET MAN: AN EVENING WITH JOHN FOXX, BRADLEY FORUM, CITY WEST CAMPUS.
Evolution of the west
Our campus plans for 2015–2018 were focused on the development of spaces that would stimulate and foster creativity and innovation, encourage new models of learning, support our enterprising research, and create greater connections with the broader community.

**Pridham Hall**

Described as the “new heart of the university”, Pridham Hall is a venue where thousands of memories will be made. Built with the support of a $5 million gift from UniSA graduate, businessman and philanthropist, Andrew Pridham, this state-of-the-art facility is based at City West Campus and features an amphitheatre, swimming pool, fully-equipped fitness centre and recreation spaces.

The space can transform into a graduation venue, performance hub, event centre, exam space, sports ground and more, for students, staff and the wider community.
THE UniSA CANCER RESEARCH CENTRE
SUPPORTS A COLLABORATIVE AND HOLISTIC
APPROACH TO HEALTH RESEARCH
University of South Australia Cancer Research Institute

Located in Adelaide’s BioMed City, this 14-storey, $247 million building is the new leading destination for health research and teaching. It is home to one of the most significant concentrations of cancer researchers in the state, and features the latest tools and technologies to support improvements in patient diagnostics and treatments.

Idea generation and growth

This impressive building is also home to the Innovation and Collaboration Centre (ICC) – a strategic partnership with the University, the South Australian Government and DXC Technology – supporting technology-based incubation and business growth.

The ICC provides a unique environment that offers services and expertise in business management, strategy and marketing, commercialisation, design and technology.
Science: the new frontier

MOD. is the nation’s newest interactive public science and creativity hub. This futuristic museum of discovery features revolutionary exhibitions and programs to build a greater understanding of the role of science in our lives and to inspire young people to undertake study in science, technology, engineering and mathematics. MOD. crosses the boundaries between science, creativity, design and education, providing a window into a new world of discovery and innovation through six dedicated gallery spaces and two studios.
