

SAGE

— Science and Gender Equity

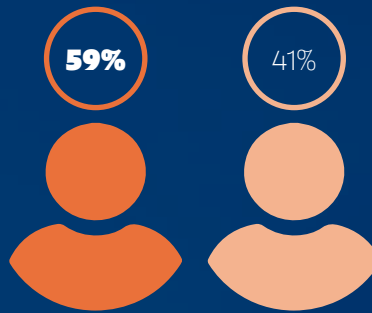

SAGE is an accreditation process where organisations review their workforce data, practice and culture and identify actions to address barriers to improving gender equity in STEMM.

STEMM is mathematical sciences, physical sciences, chemical sciences, earth sciences, environmental sciences, biological sciences, agricultural and veterinary sciences, engineering, technology, medical and health sciences, built environment and design.

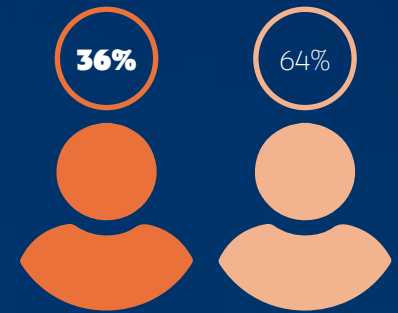

Why are we doing it?

UniSA is seeking accreditation because of our commitment to growing a diverse workforce and creating an open and transparent culture in which talent thrives and difference is valued.

Level A Academics

Professors

**UniSA wide 59% of level A Academics are women.
36% of Professors are women.**

Learnings from SAGE can be applied to all disciplines.

% Female Academics by School 2018
